- The Polish people are much more warm than I expected. They are really assiduous and dutiful. The Greek team was really lucky to have this great family as hosts for our pupils. Krakow is a lovely city. It is a trip back to time. I have already success Krakow to all my friends, as a perfect place to travel. And I think I have already persuaded them.

- We had much freetime. In the evening we were in the city. Cracow is a nice town in the night.
- The whole project was a new experience for me.
- People can face each other and exchange their personal experience and culture.
- Students can meet and become friends even from different countries.
- We had the possibility to meet and know new friends and change our cultural aspects with them. It was a very useful experience participate to a Comenius project. It can teach us to grow as European students.
- One of the best aspect of being part of the Comenius project is firstly the possibility to meet and know new people and share the cultural strength of a country and establish contacts among different cultural realities. Experiences like a Comenius project can help our own personal growth and our awareness that we are part of the same community, the European one, with different features but so near in the objectives, that of the importance of diversity and the own heritage. People can face each other and exchange their personal experience and culture. Students can meet and become friends even from different countries. This leads into a life of cultural growth that can be shared by hundreds of students all over Europe to continue to bring them out of their countries and to understand the

issues of our community. In sharing this experience we hope students and teachers outside their classroom will also take more awareness to different countries richness and opportunities.
