

Comenius Meeting
“Diversity in Europe – a common voice for a sustainable development”

Realschule Mering
Mering /Germany 08-12 May 2010

1. How do you evaluate the program of the project meeting in Germany ?

- Perfectly well organized, very good choice for visits .The coordinator Helga was very good and offered us great hospitality.
- We would like to express our satisfaction with the good organisation, the ideas that encouraged the teachers and the students of different nations to work together.
- It was an excellent program full of culture and activities. A program that students and teachers were involved.
- It was a very good and interesting program. The excellent organization made the meeting another important occasion to see and evaluate different school realities. The school is very large and students a lot. They are so clever and good students. The show was so nice and students and teachers very good at music. The school system is so well organized and everything seems to be perfect. The program was very interesting. We liked school very much and nature is very beautiful.
- It was an interesting program with sightseeing trips, meetings, good meals and very good talks with European colleagues. I think it was a bit tiring to go on a long trip day after we arrived (long travel from Norway). But all the guided tours was interesting. In general it would be nice with some more free time.
- I find the program excellent. A good balance between working at school and cultural events.

- I think it was very well organized. There was always something to do, but I have to admit that I missed some free time for us students. But except from that, I think the program was very interesting. I enjoyed the sightseeing, the old castle and churches. It was also very interesting to attend the classes at school. One of the highlights was the evening at the restaurant. That was very funny and everybody was in a good spirit.
- I think that project meeting in Germany was very good. It let us approach culture and traditions of Germany.

2.What did you learn about Germany and German people?

- A lot of things about their culture , their hospitality. I really liked the Bavarian places we visited. The teachers who involved in the Comenius project have given us great hospitality.
- The people were very friendly, hospitable, punctual, well-organised. We learnt some fact about their school system, history, culture, cuisine, traditional costumes and folk songs and dances.
- I learn about their history, their habits and culture.
- Germany is a garden and German people are kind and very nice. Everyone asked us if we needed help and information. Places and towns are very beautiful. Sites well preserved and in excellent conditions. Nearly everything is tidy and clean. Gardens and country wonderful. We knew that people take care for nature and environment and respect rules and laws about it. People seem so happy, funny and calm. The care of monuments, sites and cities is very appreciable. Traditions, culture, education and nature are taken into great consideration. Cities are so nice and full of ancient atmosphere.
- We liked German people, girls and boys very much. People were nice and kind. Parents were very friendly with us. We learnt that culture, music and care of environment are important and people take care about them. We could see that

everything is tidy and clean. We liked that a lot. Places we visited were very beautiful!

- I did learn some more about the culture, food, school and people of Germany. The Germans seemed very helpful and hospitable
- They are “gemuntlich” and hard working. Very good organizers and the conditions at school were impressive.
- I did learn a lot about the Bavarian culture, traditional dancing, music and food. I also sense that the German people are very religious. I saw signs of Jesus or crosses “everywhere”. And I remember the paintings on many of the old houses. And those paintings consider important stories or happenings of the house. I also noticed those big fields with the yellow flowers.
- German people are very nice and hospitable. Germany is a beautiful country, it's full of folklore and it has amazing architecture, I really enjoyed our visit there.

3. What were the best aspects of taking part in this project meeting?

- I really liked the communication with European colleagues , the time that we spent together and the presentation of contrasts. I am very happy because all the pupils from different countries became a team. I think that the good organization has contributed very much.
- I've met wonderful people and I had occasion to get to know something about other European countries.
- The way that students were involved all together and they become friends.
- It gives a great opportunity to take part in people’s lives and to know differences and similarities in education, school organization, didactic methods and teachers attitude. This is the best way to know a country and a population.
- Taking part in school activities, seeing different ways of teaching and studying are for us some of the best aspects of the project. The other very interesting and important thing is meeting people, different and similar to us, tasting new food and learning

new words in a foreign language.

- Meeting European colleagues and German culture and happy students(new friendship)
- A very friendly atmosphere. The work were very effective done. Very interesting excursions - I met a lot of new people. Many of them became good friends of mine. I didn't expect that this experience would turn out so great. I got to know the people so well, just out of four days! The greatest aspect for me is the people, for sure. My main goal was to get to know new people from different cultures. And I sure did! I wish we could stay for at least three more days. 😊 The spirit in the whole group was very good. And I think everyone respected each other.
- We support such projects. The students involved upgrade their knowledge which gain at different school subjects (foreign language, history, art, geography, IT...). They learn to be tolerant, co-operative respectful to other cultures, religious, different life-styles and customs..The project gives a valuable opportunity to exchange ideas.

4. Is there something you were particularly satisfied or not satisfied with about the project meeting?

- I believe that everything was perfect. I like very much the link that established between the teachers of Comenius project.
- We are particularly satisfied about the sense of safe in all the organization of the meeting and the good equipment at school to present works. Perhaps the coordinators meeting would have been made the same day.
The time off was spent in a very good way and every time spent with the other teachers and friends were very pleasant and useful to know each other. As it has to be! We were all satisfied about the welcoming and the hospitality of people and teachers. Sites and places are very very nice.
- I think I have said much about what I am satisfied with. There programme could perhaps given better opportunities for a little more time on your own.

- I was very satisfied with my host family. They were so kind and did everything to make me comfortable. I couldn't ask for a better stay in Mering! As I mention in the first question, I wish we could have a bit more free time. I missed some activities for the students. Maybe a gathering one evening, just for the students. That would be great. But don't get me wrong; I'm very pleased with the project meeting. I'm sure I will meet a lot of them I met again some time!
- I liked our trip to other places in Bawaria, also time which we've spent in Augsburg and Mering. I just think we could stay in Germany little longer.
- We would like to express our satisfaction with the good organisation, the ideas that encouraged the teachers and the students of different nations to work together. All the information was given just in the right amount so it was not difficult to understand and remember it. Everybody taking part in the project was extremely friendly, open-minded and co-operative. We are especially grateful to the hosts – teachers, students and their families. Special thanks to Ms Helga Robeller Zink and her hard- working colleagues.
